

# Data Center Solutions

## BACKUP & DATA STORAGE SERVICES

### Backup and Data Storage Services

Electronia delivers the industry's most comprehensive and flexible suite of managed storage solutions. We will back up customer data to disk and tape on our hardware, manage data backup on customer provided hardware, rotate tapes and manage customer's backup library or replicate data to alternate sites.

Outsourcing data storage to us can dramatically decrease costs and improve data availability and security.

#### Data Storage Solutions Provide

- Cost-effective backup and storage
- Fewer demands on internal IT staff
- Enhanced tools for online management
- Improved security and availability
- Real-time monitoring

#### On-site Backup and Restore

- Flat and database files
- Full weekly backups and daily incremental backups
- 14-day retention schedule
- Custom retention schedule available
- Daily Status Reports
- Customer can initiate restores
- High speed D2D for larger backups optional
- Electronia management of customer owned hardware optional
- Restores are performed to specific IP addresses only for security purposes
- Hardware, software, media, implementation, maintenance, remote operations and support included

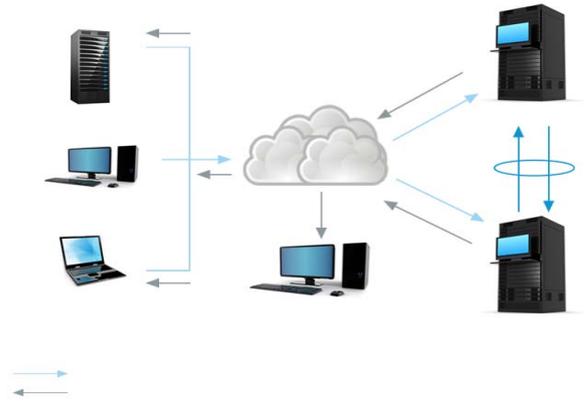

## Off-site Backup and Restore

- Electronic Vaulting - Utilizing an array of geographically diverse data centers, we offers clients the security of backing up their critical data to multiple locations. Transfer of the data is monitored in order to ensure complete and accurate backups. Electronic Vaulting clients have access to multiple Internet service providers from each Electronia data center, ensuring that the data will be backed up. Electronic Vaulting is more flexible and typically faster than removable media and physical transportation to offsite storage. Electronic Vaulting services include:

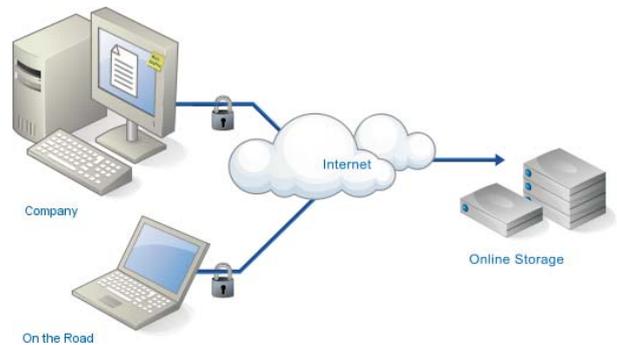

- Critical data backed up to geographically remote data center
- Data sent over secure private line
- Backups automated to ensure timely and complete data transfer
- Critical data available for fast restore

- Off-site Tape Backup - Electronia utilizes industry-leading companies to securely store valuable client data offsite. Off-site tape backup includes:

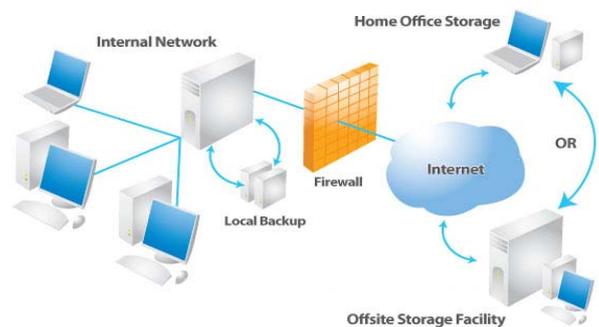

- Secure archival and retention services
- Standard and custom retention schedule available
- Flexible scheduling
- Fast restore
