

ELECTRONIA

BUSINESS AUTOMATION SOLUTIONS

EI Automax is a comprehensive Process Automation that keeps up with the trend to migrate day-to-day manual work to electronic platform that leads in online automation of key functions in various departments. Information management is part of the Business Automation Systems developed by Electronia. It efficiently automates routine tasks of the multiple departments of any organization i.e. Personnel/HR, Administrative functions, Procurement, and Stores. It is backed by a report generation capability. EI Automax was created with the objective of automating the inter-office process and distribution of information and updating in real time over the network services within an organization.
